Q. Identify the list of variables and their datatypes for the following

(i) bill of an amazon order

(ii) A train/plane/bus ticket

(iii) Current bill

(iv) Gas bill

i) Bill of an amazon Order

Order ID → String
Order date → String
Item names → Array of Strings
Item prices → Array of Doubles
Quantity → Int
Discount → Double
Shipping charge → Double
Total amount → Double
Payment mode → String

(ii) A train/plane/bus ticket

Ticket number (PNR) → String/Long
Passenger name → String
Source station/airport → String
Destination station → String
Date of journey → String
Time (Departure & Arrival) → String
Seat number → String
Coach class → Char
age → int
gender → char

(iii) Current bill

Consumer Number - long
units Consumed - int
rate per unit - float
total Amount - double
is paid - boolean
meter type - char
due date - String
Meter reading - int
Complaints calls - int
website name - String

(iv) Gas bill

Consumer number ⟶ string
Billing Period ⟶ String
Cylinderlunits used ⟶ Int or Double
Rate ⟶ double
Total amount ⟶ double
Due date ⟶ String
Delivery date ⟶ String
Payment status ⟶ Boolean
Connection type ⟶ char
Cylinder weight ⟶ float.
